AWARD WINNING REPRESENTATION

AS SOON AS we opened the doors to our new plumbing venture, I thought I better join PHCC because that's what all the great plumbing companies do. Man, I was blown away by how welcoming and friendly my new competitors were to me... and they didn't feel threatened in the least bit, encouraging me to ask them all types of questions of how to be successful in this industry. It was as if they wanted me to learn how to grow my business and be successful! Thank you PHCC!

*Pat Freund
Primo, Plumbing, San Antonio, TX*

EVERYTHING I have learned about being a successful plumbing contractor I have learned through my membership in PHCC—talking to my fellow contractor members, visiting their companies, using their ideas, and benefiting from their mistakes. This is the best business investment I have ever made—and it's not a secret! I care enough about my industry to be involved. Plumbers protect the health of the nation. Air conditioning and heating contractors protect the nation's environment. PHCC protects the trade. I urge all plumbing, heating and cooling contractors to join PHCC now. You can't afford to wait!

*Eddie Hollub,
Modern Plumbing Co., Pasadena, TX*

I FIRST became interested in PHCC in 1993 when the Medical Gas Endorsement became a requirement. Our firm was involved in that type of work and members of our team needed to be educated. We enrolled in a PHCC class taught by Eddie Hollub and Bill Jones, members of the Gulf Coast PHCC chapter. During the session, we learned about benefits of PHCC on the local, state and national levels. The educational aspect of the organization led me to become a member. The educational and membership opportunities make PHCC unique. Becoming a member of PHCC is one of the best investments that a company can make for its future!

*Doug Turner
Doug Turner Plumbing, Sugar Land, TX*

PHCC Texas Mission

PHCC Texas is the association of choice for contractor professionals and firms operating statewide. We are driven by the needs of our members to add value by:

- ★ Being the primary legislative and regulatory “watchdog” and advocate for the plumbing, heating and cooling industry in Texas;
- ★ Delivering quality education events and opportunities including pre-licensing preparatory courses and state mandated continuing education programs;
- ★ Developing and subscribing to the highest level of ethical standards and other measures of excellence for our customer’s satisfaction;
- ★ Providing information dissemination through a variety of forums including networking, mentoring and collaborative contractor problem solving; and
- ★ Creating cooperative discount product and service opportunities to assist our members in remaining competitive.

Code of Ethics

- ★ To improve ourselves, increase our efficiency and enlarge our service, and by so doing attest our faith in the fundamental principles of life, that we profit most who serve best;
- ★ To realize that we are business persons and ambitious to succeed; but that we are first ethical persons, and wish no successes that is not founded on the highest justice and morality;
- ★ To maintain the highest ethical standards of advertising, pricing, selling, installation and service guided by the principles of honesty and integrity;
- ★ To promote the latest technological advances in the design, types and methods of installation of plumbing-heating-cooling systems; using equipment and materials complying with the standards recognized by this industry;
- ★ To enter enthusiastically into the association work - to give as well as take - and do our part in elevating the industry;
- ★ To support all progressive moves that are being carried out along the lines of trade extension, standardization and sanitation;
- ★ To conduct our affairs that others in our business will find it wise, profitable and conducive to happiness to emulate our example;
- ★ To follow and execute our work in conformity with federal, state, county and city building, safety, energy and water conservation, fire and housing codes; and refusing to be a party to any action that violates these regulations;
- ★ To promote conservation of water and energy to the public we serve through improved, adequate, safe, modern installation of energy efficient equipment.
